COMNAVGER

EAST GERMANY/GREIFSWALDEN BODDEN and GLOZE Harbor Projects

ADVANCED REPORT FOR NAVY USE ONLY

In early 1956, [] an essay on planned GREIFSWALDEN BODDEN harbor [] building a big harbor there was not feasible since the surrounding waters were too shallow and the ground very unsuitable for the construction of harbor facilities. On the other hand, [] the redesigning of GLOZE harbor ("Projektierungearbeiten"; no construction work) was underway at HV SAUGENSTRASSEN. It is believed redesigning will result in a harbor-project smaller than the one originally planned.

project. It is believed that GREIFSWALDEN BODDEN harbor project will be cancelled completely, possibly in favor of GLOZE harbor project.
